SHUTTERS & PROTECTION

Roller Shutters

The S LINE roller shutters is a complete shutter system designed for residential as well as commercial buildings ensuring protection against extreme weather conditions such as cyclones and flying debris. The material of the roller shutter is very important to ensure efficiency and durability.

Advantages of Roller Shutters:

- ✓ Roller shutters are motorised and can be operated by a single click for opening and closing of shutters.
- ✓ Ensures protection against extreme weather conditions such as cyclones and flying debris.
- ✓ Offers great security against burglars.

Panel Shutters

Window and door Panel Shutters are not only aesthetic but also contribute to the security of your family and property.

Advantages of Panel Shutters:

- ✓ Enhance your opening area while giving the option of control over burglars.
- ✓ Maintenance free and made to last for a lifetime
- ✓ Choice of blades "z" louvers, "y" louvers, ellipse blades or infill to design your shutter.
- ✓ Adapts to casement as well as sliding openings.

American Shutter

Shutters are a great way to embellish your terrace or secure your big size openings. It can be hinged, bi-fold or by-pass (sliding doors). They create privacy and style and are a fantastic way to both shade and insulate your room, depending on the time of year. There are many different styles of shutters available for doors, enabling you to choose the perfect look for your home.

Advantages of Plantation Shutters:

- ✓ Add style and privacy to your home.
- ✓ Allows you to have the doors open behind the shutters but could prevent a cat/dog, for example, escaping.
- ✓ Won't move in a breeze like blinds or curtains.
- ✓ Improve the energy efficiency of your doors, which can save you money on heating.
- ✓ Provide shading to your room.
- ✓ Easy to care for and maintain.

shutters

Aluminium Gate

Aluminium gates blend perfectly into your environment. Guaranteed by a quality label it protects from bad weather. Between tradition and modernity, the aluminium gate is a popular choice.

The gate can be Swing or Sliding giving an enhanced look to your outer décor.

Characteristics :

- ✓ Weather resistant
- ✓ Light Weight
- ✓ Low Maintenance
- ✓ Impressive strength
- ✓ Simpler installation

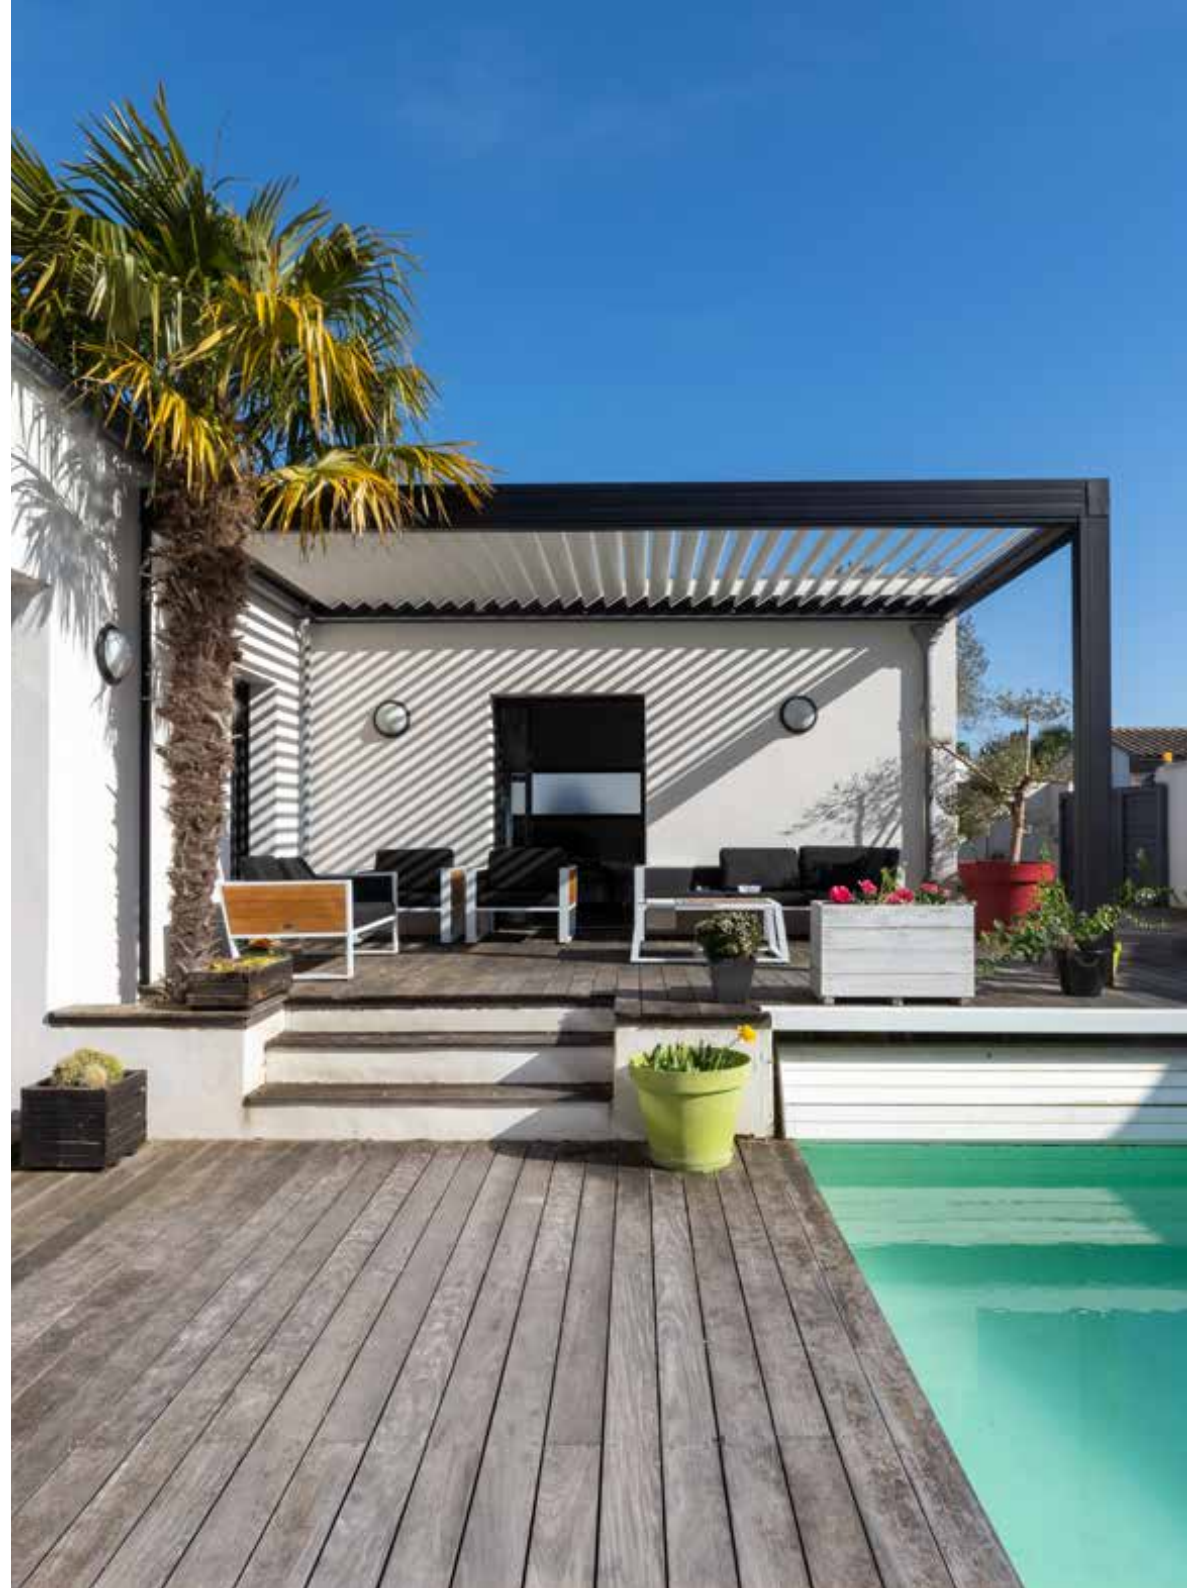

Pergola

Our **bioclimatic pergola** provides an ideal solution for your outdoor space. Whether you want to enhance your existing veranda, extend your outdoor patio, or incorporate it into a future project, our pergola is versatile and adaptable.

The adjustable blades offer flexibility: you can fully open them to enjoy the sunshine and fresh breeze, or close them completely for a sunproof and waterproof area. Plus, you have the freedom to customize the amount of sunlight and airflow by adjusting the blade angles.

Control the pergola blades manually or use the convenient remote. Additionally, consider installing LED lights to create a warm and inviting ambiance during the evenings.

VELUX ROOF WINDOW

VELUX®

VELUX ROOF WINDOW

The **VELUX** electrically vented or manually operated glass rooflight provides maximum daylight and a beautiful design. Fresh air is delivered at the touch of a button and a pre-connected rain sensor conveniently closes the window automatically in the event of rain. The innovative, maintenance-free curved glass top unit makes the glass rooflight a premium choice for homeowners that are looking for a glass-to-edge design that boosts the appearance of their homes and delivers optimal drainage.

DESIGN

- Exterior - The elegant glass-to-edge design with flat and straight lines almost appears to become one with the roof.
- Interior - The unique design with a slim frame and invisible sash provides maximum daylight.

The VELUX center-pivot roof window GGL has an innovative top control bar and can be positioned quite low or above furniture thereby allowing the users of the building to enjoy an excellent view when standing or sitting in the room. The click-on exterior covers provide a high-quality external appearance and reduce the risk of water penetration.

Screens & Nets

We provide a wide range of insect screens, suitable for casement doors & windows, sliding openings and glass louvers.

We provide 3 types of insect screens: Roll-up, Fixed and Sliding for wide openings.

Advantages of the products:

- ✓ Made from high-quality materials
- ✓ Durable and easy to use
- ✓ UV resistant mesh screen
- ✓ Energy saving and eco-friendly
- ✓ Wind resistant
- ✓ Easy maintenance

Frameless Doors

The Sunflex frameless glass sliding door system provides uninterrupted clear views, excellent operating performance and noise reduction.

The frameless glass panels slide horizontally to one or two sides. On opening and closing the first sliding panel and other sliding panels are automatically opened and closed. Complete versatility is achieved with two, three, four or five track slide and guide rail.

The Sunflex frameless glass stacking door system's timeless design makes it suitable for outside enclosures, such as balconies, terraces, patios, restaurant areas and stadium suites. Alternatively, it can be used to create a flexible, contemporary and useable open space internally as room dividers for both living and working environments.

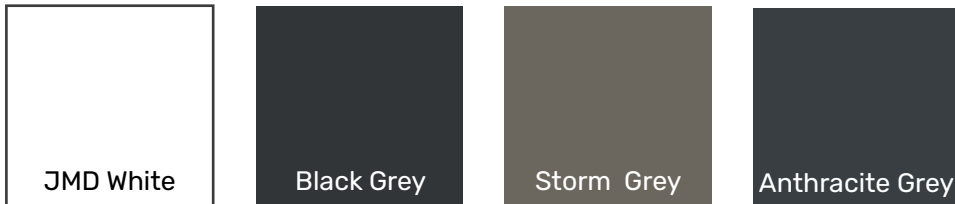

SUNFLEX 

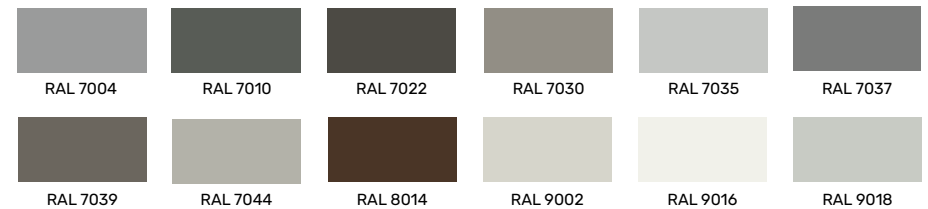

Finishes
